

Figure 1

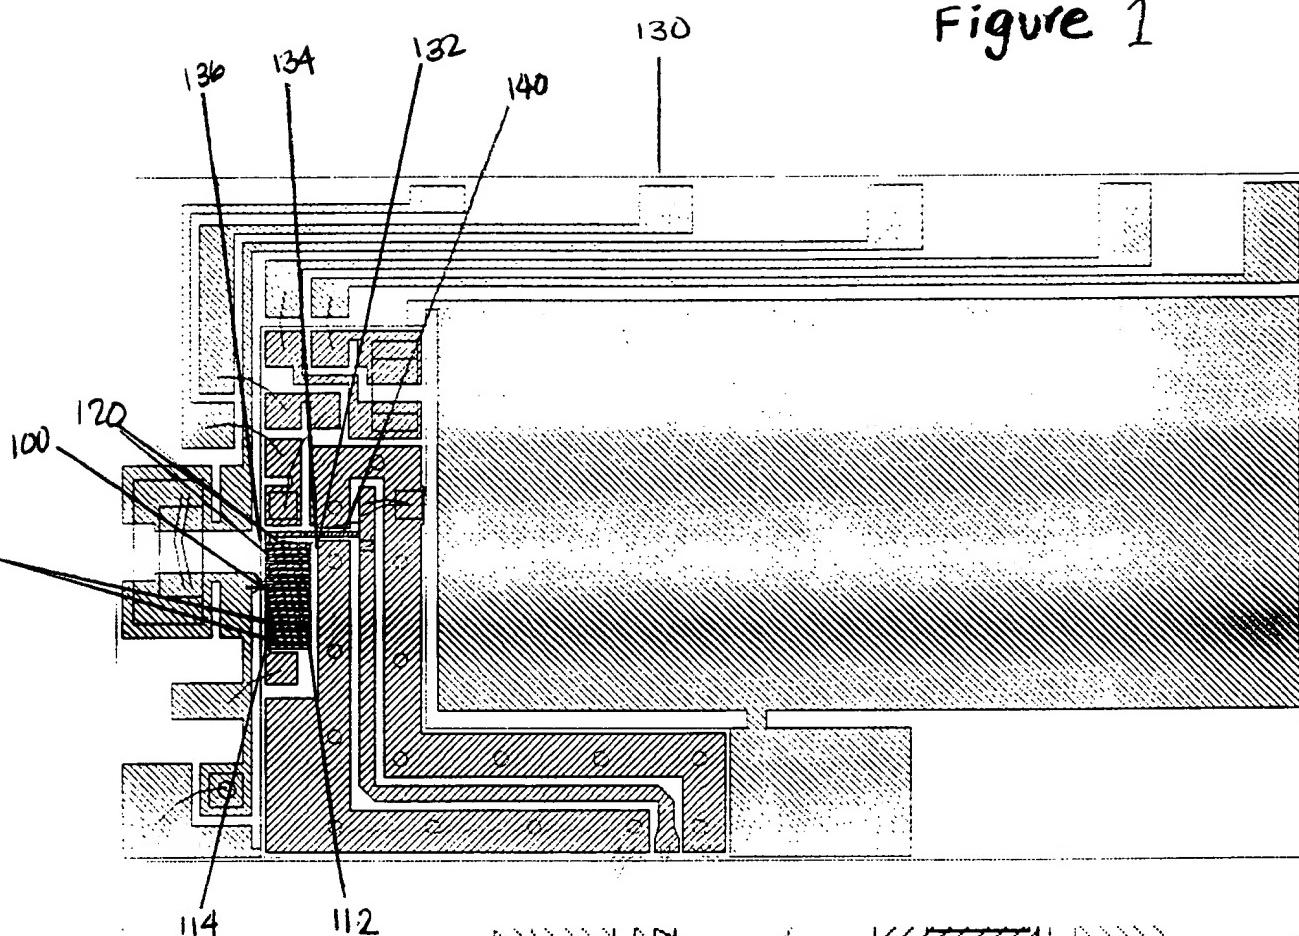

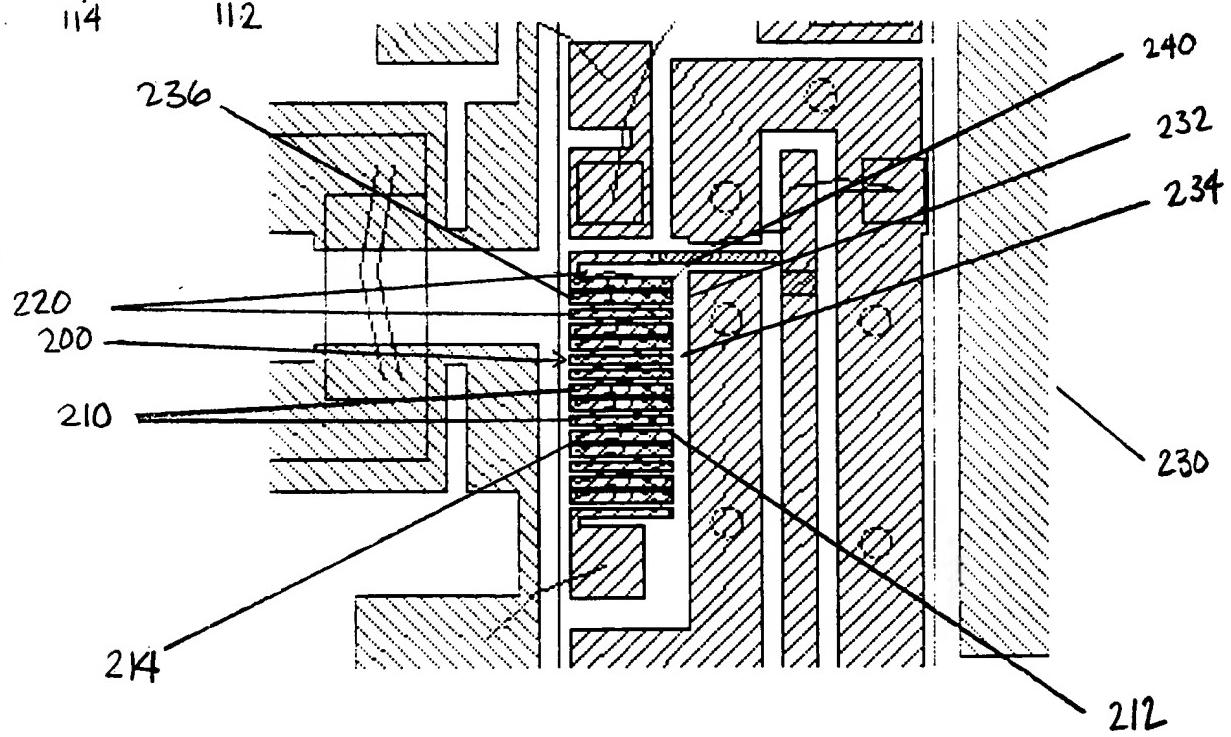

Figure 2

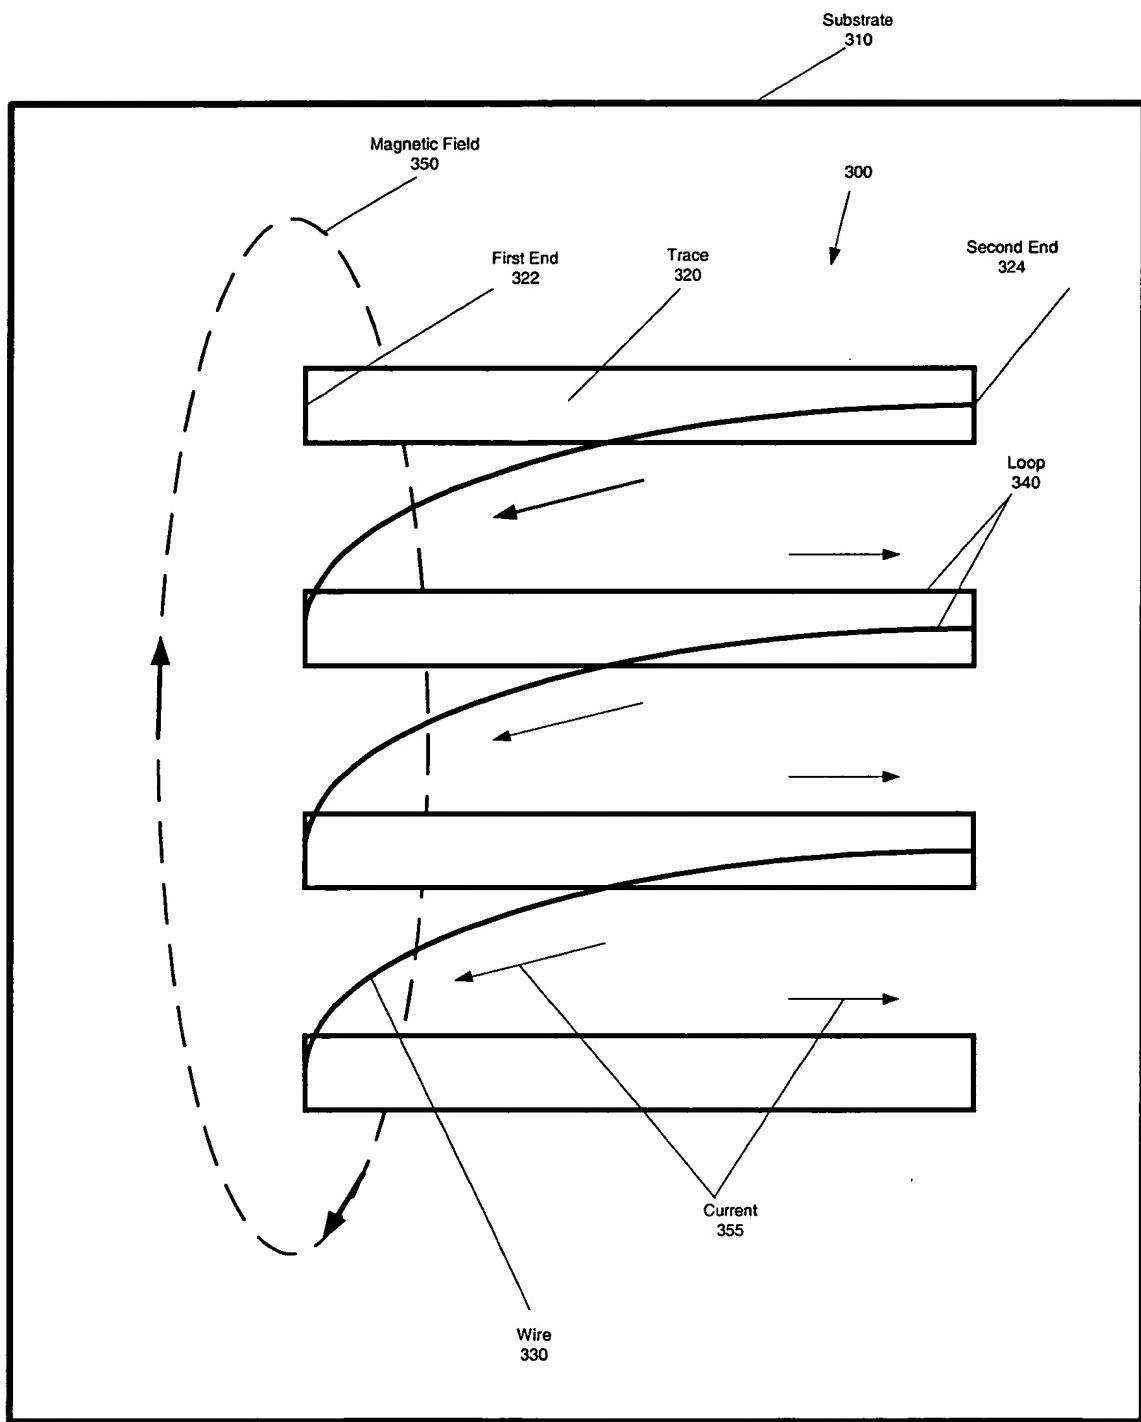

Figure 3

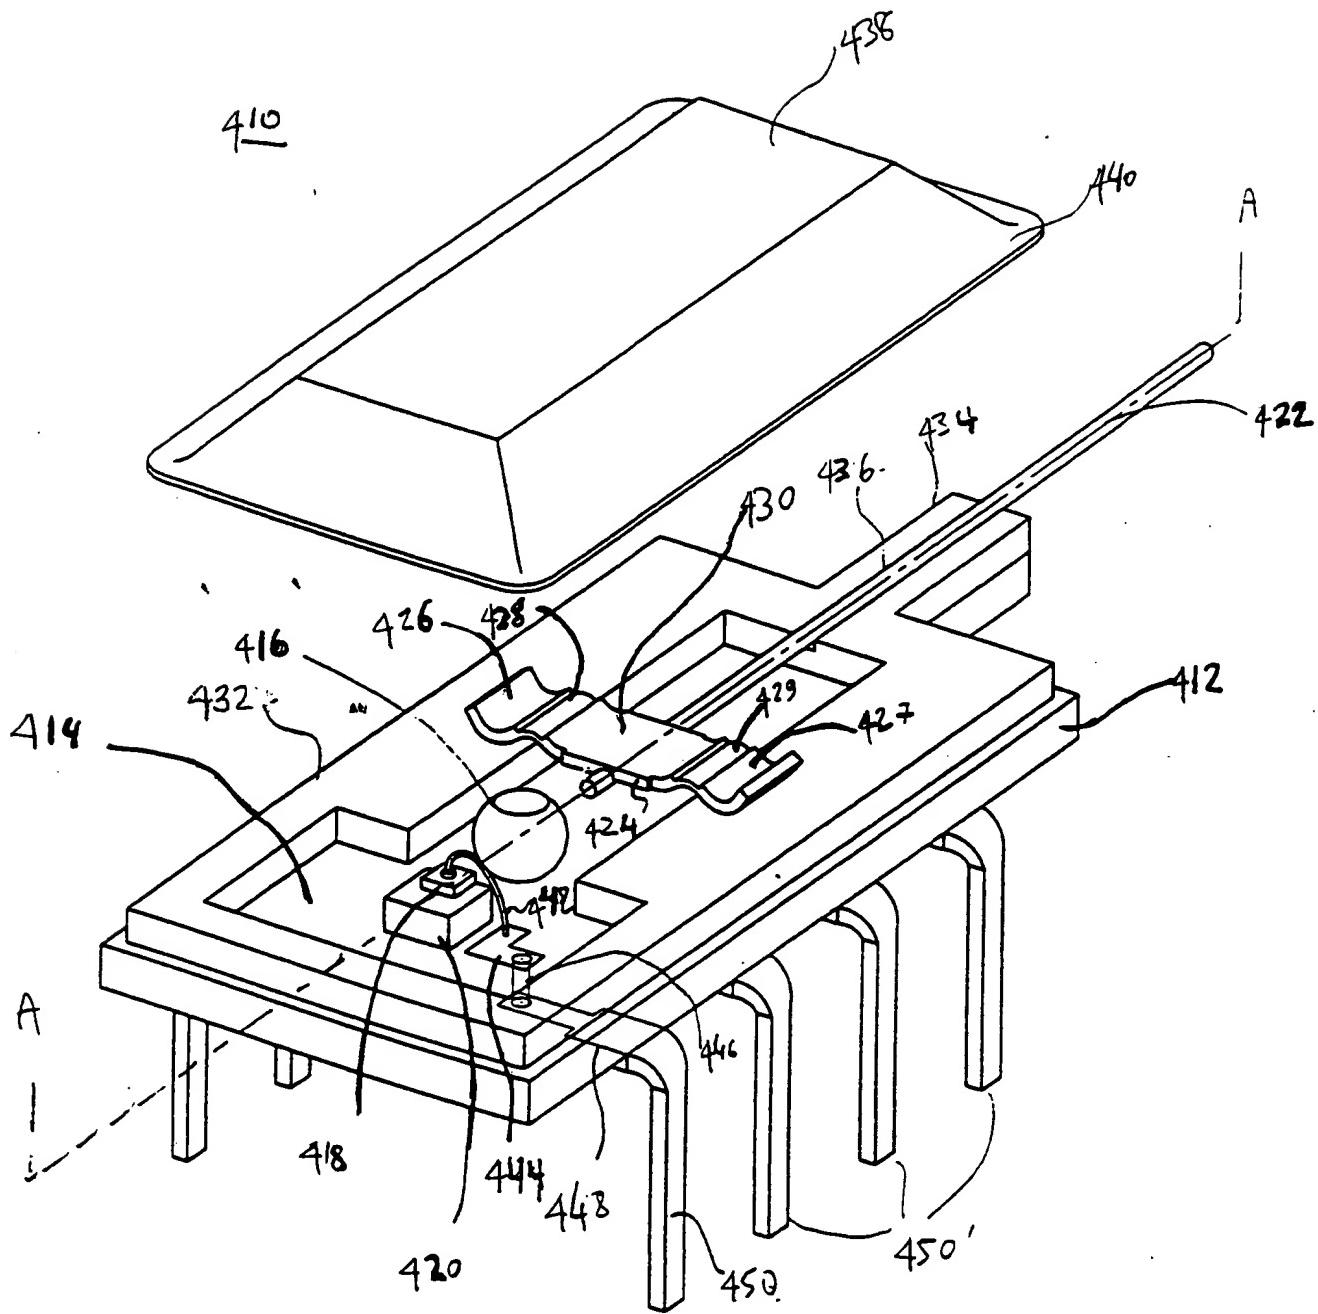

Figure 4

500

Create a plurality of traces in a substrate where each of the traces have first ends at a first side of an area of the substrate and second ends at a second side opposite the first side

410

Form a coil by bonding a plurality of wires to the traces where each wire is coupled to a first end of one trace and a second end of another trace adjacent to the one trace

520

Couple a resistor to the coil
